

Talent Development

MicroVention Velocity Program (MVP)

The MicroVention Velocity Program (MVP) is our overarching, global Talent Development strategy designed to provide development tools to all MicroVention Associates. This is a growing function that will encompass many areas for your development. MVP is here to enable cross-functional alignment, strengthen Associate empowerment and engagement, enhance innovation and creativity, all while continuing to increase overall productivity.

Development is about actively seeking new ways to grow and be challenged. Through MVP, you'll be able to develop in various ways ranging from traditional workshops, development programs to coaching and behavioral assessments. All of which are meant to help you explore and leverage your talents and narrow any gaps you'd like to close. The offerings will be designed to serve the following groups: Individual Contributors, Supervisors and Managers, Directors and VPs. MVP is kicking things off with The 6 Critical Practices for Leading a Team, designed for Supervisors, Managers, Directors, and VPs.
